

Option 2. Improved all abilities access to facilities at the carpark.

The opportunity exists for upgrades to the carpark area facilities to make them more all-abilities friendly. This can include all-abilities playground equipment, bbqs and toilet facilities.

PARK PRO DOUBLE ACCESSIBLE BBQ

Disability Accessible Certified Double BBQ Cabinet with two electric hotplates, finished in custom clad colours or stainless steel.

Figure 1. Accessible BBQ

Disabled Swing All Abilities

Figure 2. Inclusive Swing Playground Equipment

Advantages

- The equipment purchased and installed for Option 2 can be adjusted to fit the existing \$100,000 budget.
- Option 2 has no environmental impact as it relates to upgrades of existing equipment and infrastructure.

Disadvantages

- The working group noted that the Preston Beach residents separately raised funds for the existing infrastructure including the playground, gazebos and bbqs.
- It was felt that at the time these needed replacing it would be appropriate to consider enhancing inclusive equipment at that time.
- It was also felt that this option didn't align with the outcome of improving beach access and viewing, but was itself a separate project if and when the time came for replacing the existing infrastructure.
