
LPP002 – Local Planning Policy 2 – Signage

1. Intention

To:

1. Ensure signage relates to the approved use taking place at the building or land on which it is located.
2. Ensure that signs are designed to be sympathetic and harmonious with the area's amenity, streetscape and surrounding environment.
3. Encourage advertising which complements the natural and urban environment whilst minimising any negative impacts.
4. Promote a high standard of design and presentation.
5. Minimise clutter of advertising signs on any one property and along street frontages.
6. Control the erection of signs (size, type, location and quality) so as to minimise the proliferation of signs, prevent visual pollution and not detract from the amenity of an area.
7. Ensure that the scale of a sign is appropriate to the size of buildings and the lot frontage.
8. Ensure that the visual quality and character of localities and transport corridors, particularly highways, major roads and tourist routes, are not eroded.
9. Provide preferred development standards for signs in terms of illumination, area, dimensions, text, graphics and images etc.

2. Scope

This policy applies throughout the district.

3. Definitions

'Advertisement' means any word, letter, model, sign, placard, board, notice, device or representation, whether illuminated or not, in the nature of, and employed wholly or partly for the purposes of, advertisement, announcement or direction, and includes any hoarding or similar structure used, or adapted for use, for the display of advertisements. The term includes any airborne device anchored to any land or building and any vehicle or trailer or other similar object placed or located so as to serve the purpose of advertising.

'Advertiser' means any person or any group comprised of the landowner, occupier, licensee or other person having an interest in, or drawing benefit from, the display of an advertisement concerned. In this Policy, 'advertiser', 'applicant' and 'proponent' have the same meaning.

'Advertising device' means any object or structure on which any word, letter, number, symbol, figure, drawing, image or other representation or message whatsoever is written, placed, affixed, attached, painted, projected or otherwise displayed or on which provision is made for the same, for the purpose of giving any message or direction or promoting or publicising any business, project, function, enterprise, or undertaking, or any function or event, or any person, body or group, or any product or article, or other thing whatsoever, and includes an airborne device anchored to any land, building or other thing whatsoever, and also includes any vehicle or trailer or other similar object placed or located so as to serve the advertising purpose hereinbefore referred to.

'Amenity' means the quality and the conditions and characteristics of a locality or a lot or building (as the context requires) which contribute to their pleasantness and harmony and better enjoyment.

'Bill posting' means the attaching, sticking, painting, or stenciling of any bill, poster, placard or advertisement on any building, structure, fence, wall hoarding, sign post, pole, blind or awning or on any tree, rock whether erected upon private property or upon a public place and to "post a bill" has a corresponding meaning.

'Directional sign' means a sign erected in a street or public place to indicate the direction to another place, service or business but does not include any such sign erected or affixed by Council or Main Roads Western Australia.

'Main roads' and **'Highways'** are roads which are the responsibility of Main Roads Western Australia.

'Sign' has the same meaning as 'advertisement'.

'Third party properties' means properties which are not owned by the advertiser and/or from sites where the business or service is not operating.

'Tourist routes', which are non-highways and major roads, means the key tourist routes of Nanga Road and Nanga Brook Road.

Other definitions are set out in table 1 in the definitions column.

4. Statement

4.1 Sign Development Standards

Except for hoardings or illuminated directional street signs, signs shall only display the following:

- the name of the occupier/s of the business;
- details of the business carried at the premises;
- details of the goods sold in the premises to which it is affixed; and
- any other information specifically approved by Council.

No sign shall:

- not relate to the land use or occupancy of that land (i.e. advertising that promotes business or activities elsewhere or products or services names will not generally be permitted), unless otherwise specifically approved by Council;
- permitted which is set out in Table 2 of this policy;
- be free standing sign above a roof; and
- be attached to a tree that is living.

These standards are additional to the development standards in Table 1.

4.2 Signs on Third Party Land

Generally, signs should be located on land or buildings on which is conducting a business or profession which the sign relates. Council may, following appropriate justification from an applicant, consider signs on "third party" freehold properties.

4.3 Third Party Advertising Signs Adjacent to Primary Regional Roads

1. Signs are to be restricted to locations adjacent the Forrest Highway only.

2. No Third Party Advertising will be permitted along the South Western Highway and Old Coast Road.
3. A maximum of four (4) Third Party signs are to be located along the Forrest Highway. This number includes existing signs.
4. Signs must be located at least one kilometre from any other third party sign.
5. Where possible signs are to be co-located near other infrastructure such as bridges, mobile phone towers or high voltage electrical lines in order to minimise the impact on the skyline and the general landscape.
6. The location and positioning of signs are not to result in the removal of vegetation. Where absolutely necessary and where no alternative site can be found, the removal of vegetation is to be minimised and the vegetation removed is to be replaced on a suitable location on site.
7. Access platforms, safety or lighting devices should be designed and constructed as an integrated part of the sign structure so that these devices do not visually dominate the design of the sign when viewed from the highway.
8. Any sign illumination to be designed so that it does not result in overspill or glare to vehicles on the highway or buildings on land in close proximity to the sign.
9. The sign face is to be designed in a clear, easily read manner that will not distract driver attention.
10. The design of signs shall be consistent with existing third party signs approved by council with regard to size, height and advertising area.

4.4 Siting Restrictions near Highways, Main Roads and Key Tourist Routes

Council will generally not permit the siting of advertising signs on or in the vicinity of highways, major roads and key tourist routes when they provide vistas for the surrounding landscape. The protection of these vistas is important from a tourism and amenity viewpoint.

Council may consider the erection of suitable advertising signs near highways, major roads and key tourist routes where the signs are:

- on freehold land; and
- located on land or buildings on which the business or profession relates; or
- for community development or advertising road safety.

Council will require that signs are sited to minimise the impact upon surrounding vistas and to minimise impacts on the area's amenity.
